

SILCO OIL MMC 850

Description

A non-ionic emulsion of a functional polysiloxane. It is one component finish which imparts softness and resiliency to fiber fill and shape-stabilizing characteristics to textile fabrics.

Characteristics

Appearancemilky-white liquid

Active substancefunctional polysiloxane

Ionogenicity nonionic

pH value approx 5

Applications

- Fiber fill finish to add softness, slickness and resilience to quilts, pillows and similar articles
- Shape stabilizing finish for knitted and woven products made of synthetic, glass and other fibers as well as felts and non-woven.

Processing

SILCO OIL MMC 850 is applied to the fiber fill by dipping and padding or spraying. An add on level of 0.2- 0.8 % by weight of active ingredients (fibers) is recommended.

Caution

Because of the concentrated formulation, this product needs mild mixing before use.

Packaging

SILCO OIL MMC 850 is available in 200 kg Drums.

Storage

The best use before end' date of each batch is shown on the product label.

SILCO OIL MMC 850 may be stored for up to 9 months from its date of manufacture at 10-25 °C.
